## Suspension

Optimum transmission, high cornering speed, controllable at the limits and a safe driveability.

Sportive or comfortable! We do the setup like you wish. Modern suspensions with active controlled systems are offering still an optimizing of driveability because the most series suspensions are a compromise of sportive and comfort.

We can offer you various opportunities from comfortable suspension to complete adjus-

table coilover systems.

A brilliant cooperation between our development partner and test drivers is setting us in the lucky position to go on moving the limits of driving physics in your favor.

## Wheels

Form follows function or reversed, just how you wish. Give your car an individual taste.

No matter if one piece forged or modular. Between different variants and types can be chosen.

Also we can offer individual paint jobs or powder coatings of wheel center, wheel lip and wheel bed in various colors. For sportive and race driving we have weight reduced wheels

in our product range.

Another enhancement in value you can reach with our harmonic wheel designs. Strong contours or smooth curves are creating a special and personal appearance of your car and highlight the claims of sportive elegance.

## Power

Power increase based on the newest technical standards and at the level of the happening.

All components like gearbox, clutch and engine are so attuned that at every time the maximum power is available. In cooperation with aerodynamic, suspension, wheels, tires and brakes it creates an amazing value of driving dynamic. Every SP81-R is unique and has his own unmistakable and individual character.

It takes years of know how and experience to understand the automobile details and their respective characteres. The own interpretation is the next difficult but important step to get closer to the perfect automobile. We definitely succeeded at the SP81-R.

*„The whole thing is more than the sum of its parts.“*

## Interior

Fabric, leather and microfiber and also carbon, stainless steel, aluminium and wood. In combination with entertainment and multimedia. Various forms and colors in any thinkable version.

Also here the best materials are used and technology on the newest state of the things. No matter whether tone in tone, Bi-color or a mix from the respective materials, in creating the interior there are nearly no borders placed.

In the course of the years all this only became possible by an intensive collaboration with the most different companies who have specialized themselves in individualizing interiors.

Here it is exclusively pure manual labour and the standards in quality and processing are exceptionally high. Please notice that a listing of all products and variations in the interior is in this prospect not possible because of the large amount of opportunities.

Please send us your enquiry direct to [info@speedART.de](mailto:info@speedART.de). We will send you as soon as possible our response and a detailed offer.
