Hockenheim

Tuner Grand Prix 2007

„In the beginning it was just one thought“

The idea: to generate and design individuality in combination with performance. In a branch where is no space for mistakes to set up a product and a brand which has never been there before.

The purposes: from the beginning clearly defined! Exclusivity, precision and quality. Every vehicle is a hand crafted masterpiece with character.

Since the foundation in 1999, *speedART* has pursued a logical strategy of growth and progress. By a narrow collaboration with our developing partners from the most different technology regions in Germany and worldwide, the combination of traditional craftsmanship and the modern production procedure is also assured for the future.

Results? Our biggest success is if you express the enthusiasm for your car with a smile.

Everything that counts: perfect evolution! To go a step further without losing the aims out of sight. That is our task.

„You have to try the impossible, to reach the possible.“
Hermann Hesse

TITAN-EVO

A superlative car needs a superlative name.

The TITAN-EVO is a combination of a vehicle suited for everyday driving and sportscar for the race track which unites agility and driving dynamic as well as aesthetics and functionality with each other.

All this together makes the TITAN-EVO to

an unmistakeable experience of a quite special kind. The vehicles do not originate simply somewhere, they become true in exactly the same region where also the headquarter of the company PORSCHE lies namely between Zuffenhausen and Weissach in Rutesheim.

This is the place where the vehicles in craft master work are getting improved. This new headquarter of *speedART* since

the end of 2007 is the result of the logical conversion of strategy and growth. On about 2700m² originates here one of the most exciting sportscars in the world. Beside the TITAN-BTR-XL, hand-picked specialists from the most different areas assemble here the various vehicles.

„Thinking and being are determined by the contradiction.“
Aristoteles

TITAN-EVO

Unique design paired with innovative technology.

The performance of the *speedART* TITAN-EVO is overwhelmed. The rear diffuser, front spoiler, wide fender flares and side skirts, as well as the double tail pipes will be symbols for its high performance and dynamic.

The central theme of the exciting design of the vehicle refers to the whole bodywork composition and demonstrates dominance in the purest of forms. The *speedART* TITAN-EVO as *speed-HYBRID* shows that the driving performance of SUVs is comparably with sports cars. And this partially with zero-emission!

A new sport exhaust with sound control affords the possibility to choose between 2 sound levels: sportive and sonorous and discreet.

In summary: The TITAN-EVO celebrates an opus of power, agility and driving pleasure with characteristic sound.

The amazing sound comes from a completely new exhaust system with sound switch control. It can be chosen between constantly loud, constantly quiet or controlled by speed.

On the point: the TITAN-EVO celebrates a firework of power, agility and driving pleasure with a beguiling sound.

„Who wants to interest, must provoke.“
Salvador Dali

Suspension

Optimum transmission, high cornering speed, controllable at the limits and a safe driveability.

Sportive or comfortable! We do the setup like you wish. Modern suspensions with active controlled systems are offering still an optimizing of driveability because the most series suspensions are a compromise of sportive and comfort. We can offer you various opportunities

from comfortable suspension to complete adjustable coilover systems.

A brilliant cooperation between our development partner and test drivers is setting us in the lucky position to go on moving the limits of driving physics in your favor.

„Faith to those who search the truth and doubt those who already have found.“
Andre Gide

Art. Nr.: P58.340.001
Art. Nr.: P58.340.001UM

Brakes

From 62 to 0 mph faster than from 0 to 62 mph.

To secure safety by power improved vehicles, it is necessary to adapt the brakes the engine power. Like the suspension, the brakes also can be improved in different ways.

Sport brake systems up to race brake systems made of ceramic component

material. We can offer different opportunities and the right setup for your requirements. To get an maximum in brake performance all components like suspension, wheels and tires have to be attuned well. Different motorsport and hightech materials are taking place in here.

Together with our technology and developing partner we are trying to improve

the different systems and technics in security, reliability, performance and driving pleasure.

„Who says A must not say B. He can also recognise that A was wrong.“
Bertolt Brecht

Wheels

Form follows function or reversed, just how you wish. Give your car an individual taste.

No matter if one piece forged or modular. Between different variants and types can be chosen.

Also we can offer individual paint jobs or powder coatings of wheel center, wheel lip and wheel bed in various colors. For

sportive and race driving we have weight reduced wheels in our product range.

Another enhancement in value you can reach with our harmonic wheel designs. Strong contours or smooth curves are creating a special and personal appearance of your car and highlight the claims of sportive elegance.

„The normality is a paved street, you can go well on it, however, there grow no flowers on her.“
Vincent van Gogh

Engine / Sport exhaust systems

Power increase based on the newest standards of technics and on top of the happening.

Power in every situation, is brought to the TITAN-EVO.

All components like gearbox, clutch and engine are so attuned that at every time the maximum power is available. In co-operation with aerodynamic, suspensi-

on, wheels, tires and brakes it creates an amazing value of driving dynamic.

„The whole thing is more than the sum of its parts.“
Aristoteles

Interior

Fabric, leather and microfiber and also carbon, stainless steel, aluminium and wood. In combination with entertainment and multimedia. Various forms and colors in any thinkable version.

Also here the best materials are used and technology on the newest state of the things. No matter whether tone in tone, Bi-color or a mix from the respective materials, in creating the interior the-

re are nearly no borders placed. In the course of the years all this only became possible by an intensive collaboration with the most different companies who have specialized themselves in individualizing interiors.

Here it is exclusively pure manual labour and the standards in quality and processing are exceptionally high. Please notice that a listing of all products and

variations in the interior is in this prospect not possible because of the large amount of opportunities.

Please send us your enquiry direct to info@speedART.de. We will send you as soon as possible our response and a detailed offer.

„Temptations you should give in. Who knows if they come back!“
Oscar Wilde
