Interior

Interior program 75

„In the beginning it was just one thought“

The idea: to generate and design individuality in combination with performance. In a branch where is no space for mistakes to set up a product and a brand which has never been there before.

The purposes: from the beginning clearly defined! Exclusivity, precision and quality. Every vehicle is a hand crafted masterpiece with character.

Since the foundation in 1999, *speedART* has pursued a logical strategy of growth and progress. By a narrow collaboration with our developing partners from the most different technology regions in Germany and worldwide, the combination of traditional craftsmanship and the modern production procedure is also assured for the future.

Results? Our biggest success is if you express the enthusiasm for your car with a smile.

Everything that counts: perfect evolution! To go a step further without losing the aims out of sight. That is our task.

„You have to try the impossible, to reach the possible.“
Hermann Hesse

SRS

The *speedART-SRS* based on the PORSCHE 997 Carrera, is like his ancestor a combination of a vehicle suited for everyday driving and sportscar for the race track which unites agility and driving dynamic as well as aesthetics and functionality with each other.

All this together makes the SRS to an unmistakable experience of a quite special kind. The *speedART-SRS* do not

originate simply somewhere, they become true in exactly the same region where also the headquarter of the company PORSCHE lies.

The only 15 minutes distant swabian Rutesheim is the place where the vehicles in craft master work are getting improved. This new headquarter of *speedART* since the end of 2007 is the result of the logical conversion of strategy and

growth. On about 2700m² originates here one of the most exciting sportscars in the world.

Beside the SRS, hand-picked specialists from the most different areas assemble here the various vehicles.

„Thinking and being are determined by the contradiction.“
Aristoteles

To bring elegance and athletic in harmony was the premise in case of the SRS. At the same time provides the SRS with his risqué proportions, harmonious surfaces and structured lines, the impression of smooth elegance.

The front part of the vehicle with the frontspoiler lip allows to foresee the performance potential already in stand. An optimized air guidance and an improved current behaviour contributes also to the increased achievement like the extremely light materials which are also taking place here. Carbon materials also spray here a certain racing sport atmosphere.

The thrilling form of the vehicle stretches from the area of side skirts up to the rear diffuser in the back and also give the vehicle dominance in pure.

Raised spoiler in the rear, engine hood with RAM-air function, as well as rear diffuser and front spoiler are guarantors of the necessary downforce.

The SRS is a striking vehicle and leaves a remaining impression.

„Who wants to interest, must provoke.“
Salvador Dali

speedART

SRS

Proven achievement in a new dimension but still suitable for everyday driving.

The DFI-technology was strictly improved in collaboration with our developing partners. Therefore are 430hp and 440Nm torque available.

0-62 mph 4,6s, Vmax about 186 mph. Values that impress like the whole car.

The amazing sound comes from a completely new exhaust system with sound switch control. It can be chosen between constantly loud, constantly quiet or controlled by speed.

On the point: The SRS celebrates a firework of power, agility and driving pleasure with a beguiling sound.

„The living of the imagination is no escape in the unreal, it is boldness and invention.“
Eugene Ionesco

SRS

Also in chassis and brakes we have done innovative and successful jobs together with our developing partner.

With the SRS we can offer you different variations of chassis setups. Sportive setup but reasonable for every day or a complete adjustable CUP - coilover suspension, everything is possible. Also have been installed some stabilizers and strut bars for a better driving dynamic.

The interplay between aerodynamic, suspension and brakes is convincing and the pilot is not overcharged at any time.

So much power has to be decelerated sometimes. The aim is to be quicker from 62-0 mph, as from 0-62 mph. Between steel or ceramic brakes can be chosen. Forged wheels with a reduced weight are supporting the brake and a

modified air guidance of the brake system lowers the fading under racing conditions. Matching tires are providing the necessary Grip.

„The talents are often not so unequal, assiduity and character are making the difference.“

Theodor Fontane

Suspension

Optimum transmission, high cornering speed, controllable at the limits and a safe driveability.

Sportive or comfortable! We do the setup like you wish. Modern suspensions with active controlled systems are offering still an optimizing of driveability because the most series suspensions are a compromise of sportive and comfort. We can offer you various opportunities

from comfortable suspension to complete adjustable coilover systems.

A brilliant cooperation between our development partner and test drivers is setting us in the lucky position to go on moving the limits of driving physics in your favor.

„Faith to those who search the truth and doubt those who already have found.“
Andre Gide

Brakes

From 62 to 0 mph faster than from 0 to 62 mph.

To secure safety by power improved vehicles, it is necessary to adapt the brakes the engine power. Like the suspension, the brakes also can be improved in different ways.

Sport brake systems up to race brake systems made of ceramic component

material. We can offer different opportunities and the right setup for your requirements. To get an maximum in brake performance all components like suspension, wheels and tires have to be attuned well. Different motorsport and hightech materials are taking place in here.

Together with our technology and developing partner we are trying to improve

the different systems and technics in security, reliability, performance and driving pleasure.

„Who says A must not say B. He can also recognise that A was wrong.“
Bertolt Brecht

Wheels

Form follows function or reversed, just how you wish. Give your car an individual taste.

No matter if one piece forged or modular. Between different variants and types can be chosen.

Also we can offer individual paint jobs or powder coatings of wheel center, wheel lip and wheel bed in various colors. For

sportive and race driving we have weight reduced wheels in our product range.

Another enhancement in value you can reach with our harmonic wheel designs. Strong contours or smooth curves are creating a special and personal appearance of your car and highlight the claims of sportive elegance.

„The normality is a paved street, you can go well on it, however, there grow no flowers on her.“
Vincent van Gogh

RETRO-FORGED-DESIGN 19"

1-piece forged

RETRO-FORGED-DESIGN 19"

1-piece monobloc forged
1-piece forged monobloc wheel

Despite the fact that this construction has a high solidness it also has by comparison a low weight. The offset can be adjusted by millimeters. Because of this construction there is no need for spacers.

RETRO-FORGED-DESIGN 19"

RSC II Elegance 20"

3-piece screwed & welded

RSC II Elegance

3-piece screwed & welded

Screwed & welded 3-piece wheel consists of:

- Center star (Aluminium casted or forged)
- Outer wheel bed (Aluminium cold forged, rolled, CNC-machined) glossy polished and anodized
- Inner wheel bed (Aluminium cold forged, rolled, anodized)

Because of the welded rim rings the center star needs less screws to get the necessary solidness. Due to the fact there is more scope to design the wheel. For example in the area of the spokes there is no need for screws.

Cross Racing 20"

3-piece screwed

Cross Racing

3-piece screwed

Screwed 3-piece wheel consists of:

- Center star (Aluminium casted or forged)
- Outer wheel bed (Aluminium cold forged, rolled, CNC-machined) glossy polished and anodized
- Inner wheel bed (Aluminium cold forged, rolled, anodized).

At almost all 3-piece outer wheel beds is the rim flange rolled to the inner side. Those wheel beds have a cavern and reduced solidness compared to the forged outer wheel beds made of full aluminium. Also those wheel beds have a safety E.T.R.T.O. hump which is an advantage compared to other wheels of the competitors.

Engine

Power increase based on the newest technical standards and at the level of the happening.

All components like gearbox, clutch and engine are so attuned that at every time the maximum power is available. In cooperation with aerodynamic, suspension, wheels, tires and brakes it creates an amazing value of driving dynamic. Every SRS 385 is unique and has his

own unmistakable and individual character.

It takes years of know how and experience to understand the automobile details and their respective characteres. The own interpretation is the next difficult but important step to get closer to the perfect automobile. We definitely succeeded at the SRS 385.

*„The whole thing is more than the sum of its parts.“

Interior

Fabric, leather and microfiber and also carbon, stainless steel, aluminium and wood. In combination with entertainment and multimedia. Various forms and colors in any thinkable version.

Also here the best materials are used and technology on the newest state of the things. No matter whether tone in tone, Bi-color or a mix from the respective materials, in creating the interior the-

re are nearly no borders placed. In the course of the years all this only became possible by an intensive collaboration with the most different companies who have specialized themselves in individualizing interiors.

Here it is exclusively pure manual labour and the standards in quality and processing are exceptionally high. Please notice that a listing of all products and

variations in the interior is in this prospect not possible because of the large amount of opportunities.

Please send us your enquiry direct to info@speedART.de. We will send you as soon as possible our response and a detailed offer.

„Temptations you should give in. Who knows if they come back!“
